STEARMAN 4-EM

Scale: 1/6

Wingspan: 76", Length: 59", Height: 20 3/8"

Wing Area: 1230 sq. in.

Weight: 12-14 lbs.

Power: .90 to 1.08 glow, 1.20 4-stroke

This plan is one of the finest, most beautifully prepared set of drawings, I have ever seen. Robert Sweitzer has detailed everything including, landing gear, scale-like control systems, servo and radio installation, 1/4 scale cockpit and interior details, flying wire and strut fittings, and even the scale propeller. Numerous isometric details are included to help with construction. The fuselage can be framed from 1/4" and 3/16" hardwood dowels for scale realism or you can use square spruce or basswood. Wings are plug-in type with cabane and upper center section remaining in place on the fuselage. Color and marking details are shown for several versions including "Canadian Airways Limited – Royal Mail" and Standard Oil of California". Plans consist of six sheets, one 3'x6', two 3'x8', one 3'x8', one 3'x9'-6", and one 3'x11'.

Scale: 1:4

Wingspan: 96.5" Length: 70.5"

Wing Area: 2340 sq. in.

Weight: 55+ lbs.

Power: 110cc Gas & Up

These plans were developed from a complete set of Grumman factory drawings provided by Vince Juliano, a Grumman Historian. The plans are very detailed and include scale locations of ribs, formers, airfoils, offsets, and incidences. The plans are intended for the experienced builder. The engine installation shown of the plans is for the Moki 215/250 radial. Battery, radio gear, and main gear retract access is via removable scale access hatches. The main gear retracts are currently under development by Bavington Machine Works. A removable fiberglass tail cone is used for access to the rudder and elevator linkages.

Marine Corps insignia and squadron emblem for 2-MF-16 on display on the museum floor of the Naval Aviation Museum, Pensacola NAS are available from Pro-Mark Graphics, 861 Winnebago Ave., Olmstead, Il 62970, Phone 618-742-6455, www.pro-mark.com
